

# Default Page Editor

# Default Page Editor

The default editor in BookStack is a ‘What You See Is What You Get’ (WYSIWYG) editor. The usage of this editor is similar to typical word-processing applications such as Word or Google Docs.

## Editor Shortcuts

The following shortcuts are available in the WYSIWYG Editor:

| Shortcut (Windows & Linux/Mac)                                                                          | Description                                                  |
|---------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| <div>Ctrl+S / Cmd+S</div>                                                                               | Save Draft                                                   |
| <div>Ctrl+Enter / Cmd+Enter</div>                                                                       | Save Page & Continue                                         |
| <div>Ctrl+B / Cmd+B</div>                                                                               | Bold                                                         |
| <div>Ctrl+I / Cmd+I</div>                                                                               | Italic                                                       |
| <div>Ctrl+U / Cmd+U</div>                                                                               | Underline                                                    |
| <div>Ctrl+1 / Cmd+1</div> <div>Ctrl+2 / Cmd+2</div> <div>Ctrl+3 / Cmd+3</div> <div>Ctrl+4 / Cmd+4</div> | Header Large<br>Header Medium<br>Header Small<br>Header Tiny |
| <div>Ctrl+5 / Cmd+5</div> <div>Ctrl+D / Cmd+D</div>                                                     | Normal Paragraph                                             |
| <div>Ctrl+6 / Cmd+6</div> <div>Ctrl+Q / Cmd+Q</div>                                                     | Blockquote                                                   |
| <div>Ctrl+7 / Cmd+7</div> <div>Ctrl+E / Cmd+E</div>                                                     | Code Block                                                   |
| <div>Ctrl+8 / Cmd+8</div> <div>Ctrl+Shift+E / Cmd+Shift+E</div>                                         | Inline Code                                                  |
| <div>Ctrl+9 / Cmd+9</div>                                                                               | Callout<br>(Keep pressing to toggle through styles)          |
| <div>Ctrl+O / Cmd+O</div> <div>Ctrl+P / Cmd+P</div>                                                     | Ordered List<br>Bullet List                                  |
| <div>Ctrl+Shift+K / Cmd+Shift+K</div>                                                                   | Link to BookStack content                                    |
