

Portainer

Manage the Docker environment where Portainer is running.

Ensure that you have started the Portainer container with the following Docker flag:

```
-v "/var/run/docker.sock:/var/run/docker.sock" (Linux).
```

or

```
-v \\.\pipe\docker_engine:\\.pipe\docker_engine (Windows).
```

Remoteverwaltung:

```
New-NetFirewallRule -DisplayName 'Docker SSL Inbound' -Profile @('Domain', 'Public', 'Private') -  
Direction Inbound -Action Allow -Protocol TCP -LocalPort 2376
```
