<https://github.com/jnk22/kodinerds-iptv>

<https://www.kodinerds.net/index.php/Thread/56713-Kodinerds-IPTV-Fertige-Liste-mit-freien-IPTV-Kan%C3%A4len/>

For EPG try this <http://www.webgrabplus.com/> and for logos have a look here

<http://forum.kodi.tv/showthread.php?tid=228026> there is also a logo downloader plugin in that thread

For EPG try this <http://www.webgrabplus.com/>

Go to <http://iptv-epg.com> and get EPG for 60+ countries and 6500+ channels.

There you get EPG for US and UK channels too.

You can create a personalized EPG list with a few clicks and your xml is generated within seconds.

i tried them but had problem with the times and data and no support..., using <https://epgguide.net> and have to add xmltv to my m3u but they support business providers only but the price is cheap and support good, just my 5 cents!

Cheers
