

vmWare

Export VMWare Player's Virtual Machines to an OVF file

1. Find the path to your **VM**.
2. Open a command prompt (elevated).
3. Type CD\program files\vmware\vmware OVF_Tool.
4. Enter.
5. type ovftool "C:\the path to your **VM**\your VMname.vmx" c:\new directory\name.**ovf**.

Import

```
qm importovf 999 WinDev1709Eval.ovf local-lvm
```
