

Installation

- [Reset](#)

Reset

Als Administrator ausführen

```
devenv.exe /resetsettings
```

This command will reset Visual Studio to its default settings.

```
devenv.exe /resetuserdata
```

This command will reset Visual Studio's user-specific data, which includes settings, customizations, and extension configurations.

Please note that uninstalling Visual Studio 2022 Professional will remove the application and its associated components from your system. However, it may not remove certain user-specific settings or files. If you want to remove any residual files or settings, you can manually delete the following directories:

- C:\Program Files\Microsoft Visual Studio\2022\
- C:\ProgramData\Microsoft\VisualStudio\2022\
- %USERPROFILE%\AppData\Local\Microsoft\VisualStudio\2022\
- %USERPROFILE%\AppData\Roaming\Microsoft\VisualStudio\2022\
